MULTI-FEED FEATURES AND OPTIONS

OPTIONAL FEEDING EXTENSIONS BUILT TO SUIT

QUADRUPLE BEATER SYSTEM

THE KIRBY MULTI-FEED was first introduced back in 1949 to help the local dairies feed their cattle with greater efficiency. It has only gotten better with time! With the heavy duty engineering at every aspect, a quadruple beater system and consistent flow control, the Multi-Feed Truck or Trailer won't stop until you do. Each feeder is designed to help you reap energy savings while maintaining a constant discharge.

It's time to get more done in less time!
